SV207 小笼汤包机

Soup Dumpling Machine

Product Specifications

Engineered for premium soup dumpling production, the SV207 Soup Dumpling Production Line is available in multiple configurations to meet different capacity and automation requirements. Longyu 's patented water-cooled forming head technology helps maintain the dough structure and achieve a thin, uniform wrapper with excellent filling encapsulation.

Together with specially designed cutting blades, the machine can produce wrappers as thin as 1 mm, resulting in crystal-clear soup dumplings filled with rich, flavorful broth after steaming. Developed through years of continuous optimization, the SV207 combines reliable performance with exceptional product quality to deliver authentic handmade-style results at industrial scale.

Product Introduction

Product Dimension	168*83*156cm	Power	3.9KW
Net Weight	490KG	Production Capacity	10-80/min
Voltage	380VDC	Finished Product Weight	10-50g

Available Optional Fittings

Processing Range

Shanghai Longyu Eletro-Mechanic Technology Co., Ltd
