SV400 包排一体机

Integrated Encrusting & Forming

Product Specifications

Engineered for gentle handling and integrated production, the SV400 Encrusting & Tray Loading System combines forming and tray loading in a single machine to reduce floor space and simplify operation. Available in dedicated bakery and pastry versions, the system is designed for soft, sticky, hot, or delicate products that are prone to deformation during manual handling.

By transferring products directly into trays after forming, the SV400 helps maintain product integrity and ensure consistent appearance. It is ideal for bakery applications such as Egg Yolk Cakes and Golden Brick Cakes, as well as frozen and confectionery products including ice cream mochi, glutinous rice cakes, and Osmanthus Cakes.

Product Introduction

Product Dimension	290*119*137cm	Power	2.4KW
Net Weight	320kg	Production Capacity	60-80pcs/min
Voltage	220VAC	Finished Product Weight	8-150G

Available Optional Fittings

Multi-Layer Filling System

Expandable to support customized multi-dough and filling combinations.

Forming Attachments

Adapts to different product textures and ingredients for optimal shaping results.

Top & Bottom Flour Dusting Unit

Provides top and bottom flour dusting for sticky products, ensuring smooth handling and improved texture

Automatic Tray Loading System

Automatically feeds trays to support fully automated production.

Processing Range

Shanghai Longyu Eletro-Mechanic Technology Co., Ltd
