Filled Pork Ball Production Line

隆豫机器人（浙江）有限公司

Production Line Introduction

Filled pork balls offer consumers a unique combination of juicy textures and flavorful fillings, making them increasingly popular in frozen and ready-to-eat markets. Achieving consistent shape and precise filling distribution is essential for large-scale production. LONGYU provides flexible production solutions that help manufacturers ensure stable quality and maximize productivity.

Product Parameters

Product Images	Product Name	Model No.	Technical Specifications	Features
	First Generation Multifunctional Filling Machine	SV208	Speed: 60–80 items per minute Product weight: 10–250 grams Voltage: 220V 50Hz Power: 1.75 kilowatts Machine dimensions: 168 × 86 × 130 centimetres Machine weight: 280 kilograms	Interchangeable molds and optional attachments for a wide range of products.
	All-in-one round dough shaping and tray loading machine	SV-310	Machine dimensions: 187 × 110 × 102 cm Production speed: 90–100 units per minute Voltage: 220 V Power: 1.2 kW Machine weight: 180 kg Product weight: Depends on the upstream equipment	Designed for high-roundness products with custom drums and auto tray loading.
